

# CONFIDENTIAL

HeroCTF internal note / Authorized Staff Only

Required security clearance: ERROR#BufferOverflow

The purpose of this document is to go over the issues of the 3<sup>rd</sup> edition. This document must remain confidential. Indeed, no one can know what a disaster it was.

Here is a non-exhaustive list of problems we encountered:

- Poor system challenge maker who let people become root on shared instances
- No personal instances
- Crypto miners in docker shared instances
- Foreign attacks on the infrastructure

If I had to resume this edition from an admins point of view in one sentence:

But the worst of the worst is the following:

Sorry, I had to redact this part, it was too harsh.
